

Dmitry Stroganov

dm@devcell.com

linkedin.com/in/dmitrystroganov

location: totally flexible

Mixed experience (%: 40/30/30):
tech lead, architect, principal engineer

Education: higher, technical, computer science.
Reliable, structured, result-oriented, a doer and learner.

Fluent English, intermediate Danish, basic Spanish.
Certifications: ITIL, SCRUM, MCP

To whom it may concern,

A self-starter, with hands-on experience in software solution going back to 2000, I have been continuously learning on a wide variety of projects, people and cultures.

My personality: 41, divorced, no dependencies, EU life & work 2008-2019. Very responsible, organized, with time management, presentation and communication skills.

Culturally: I love Nordic life style, German governance.

I'm looking for long-term, fully dedicated commitment to technology/platform ownership.

List of direct references, to confirm my existence and well-being can be provided.

Sincerely,

Dmitry Stroganov

Specialization: Technical Lead, Technical Product Manager.

Guiding engineers, enabling effective development practices. Planning and scheduling work and delivery. Acting as technical projects manager and developer advocate - between business and tech.

Taking ownership from idea to delivery, and guiding teams in doing so, is my passion.

- Solution lifecycle ownership (system/platform/product level)
- Ability to guide incremental delivery
- Project dependencies resolution, team coordination
- Continuous integration and delivery (Release Management)
- Jira, Confluence, VersionOne, Trello

History

Freelance Contractor, Technical Lead @FinTech

2022, present

Hybrid/remote

Responsibility: 4 teams - Analytics, Engineering, Testing, DevOps

Scope:

- Solution evaluation, prototyping, complexity decomposition, efforts deduplication
- Guiding technology and processes choices
- Enable efficient execution and delivery

Accomplishments:

- Taken on project quality: adapt, lift and enforce development standards, quality control automation.
- CI/CD introduction, delivery migration from x-copy to container-based.
- Cross-team cooperation improvements.
- Profiled team(s) performance, collected and delivered feedback.
- Improved delivery quality and speed.
- Created and maintained technical documentation.
- Continuously identified narrow or legacy spots across project, analysed dependencies, decomposed complexity.

Tech stack: C# (.Net Core), Docker

Freelance Contractor, Technical Lead @FinTech

2020, 2 years

US, remote

Lifted a FinTech start-up from idea to production run system, which included: hiring for the growing team, processes setup (continuous integration, change management and delivery), solution and integrations design.

Successfully delivered the B2B product, which has further shaped into a flexible platform, reusable by business partners.

Tech stack: C# (.Net Core), Docker, MS Azure

SimCorp

simcorp.com

2015, 5 years

Copenhagen, Denmark

Back-end and frameworks

Was working for various projects, running under SAFe implementation.
Scope: secure, elastic, maintainable systems and frameworks for a hybrid cloud environment.

Can be best described as go-to person with "will be done" attitude.

Tech stack: C# (.Net Core), Docker, MS Azure, K8S

Sitecore A/S

sitecore.net

2011, 4 years

Copenhagen, Denmark

Senior C# developer, back-end and frameworks

Tech stack: TFS, C#, NoSql (MongoDB), BDD (SpecFlow), Asp .Net.

Copenhagen Business School

cbs.dk

2010, 1.5 years

Copenhagen, Denmark

Software Development Consultant

Tech stack: Jira, C#, LINQ, WCF, Asp .Net (WebForms, MVC), SharePoint.

Saxo Bank

saxobank.com

2007, 2 years

Copenhagen, Denmark

Senior Software engineer (C#), back-end and frameworks

Tech stack: C#, Asp .Net, SharePoint.
